- 1 *Unique Materials for Unique Solutions*
- 2 *It's All in the Design*
- 3 *Cover Plug System Solutions*
- 4 *Full Wrap and Two-Piece Cover Solutions*
- 5 *Engine on Stand Solutions*
- 6 *Tire Cover Solutions*
- 7 *Military & Misc. Solutions*
- 8 *Bring Us Your Project*

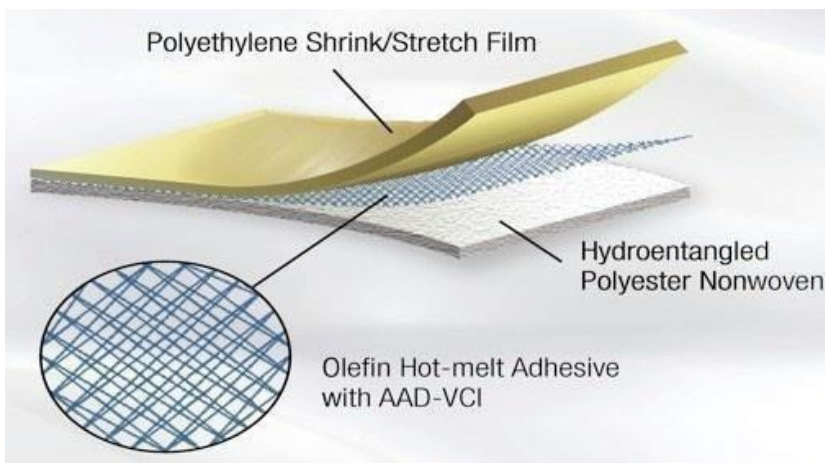

Unique Materials For Unique Solutions

Preneet Covers are manufactured from patented materials developed to assist in the constant fight against corrosion.

Created by a process of adhering a protective **outer layer** to a soft, surface friendly **inner layer** that cushions and protects delicate surfaces.

The **middle layer** consists of an olefin hot melt, that contains a Vapor Corrosion Inhibitor (VCI) additive, to further assist where the cover lays over the asset, and residual moisture could be trapped.

Available in **7-ml Aviation Red** and a more robust **10-ml White** that offers a heavier load of Vapor Corrosion Inhibitor (VCI).

Reflects 85% of the sun's harmful ultraviolet rays.
Vapor transmission rate of 1.3 grams 100 sq in/24 hours.
Repels rain, snow, dust, dirt, rodents, birds and guards against FOD

Armordillo – Made to withstand extreme environments from intense heat and humidity to brittle cold and snow.

- Reduces corrosion by 85-95%
- High moisture removal rate
- Anti-microbial properties to control mold and mildew
- Can be installed and removed daily

It's All in the Design

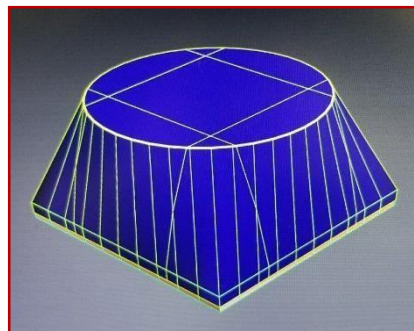

For **Basic Covers**, a simple 2D drawing or sketch is all it takes to produce a custom cover to protect your asset. For more **Complex Covers**, a 3D Laser scanner is used to capture the item, and a new 3D model is created.

The Design Process

STEP 1

A 3D Laser scanner is used (*when a 3D file is not available*), to capture the item on location.

STEP 2

A 3D model is created from the scan and a render is produced for review by the design, engineering, and production teams.

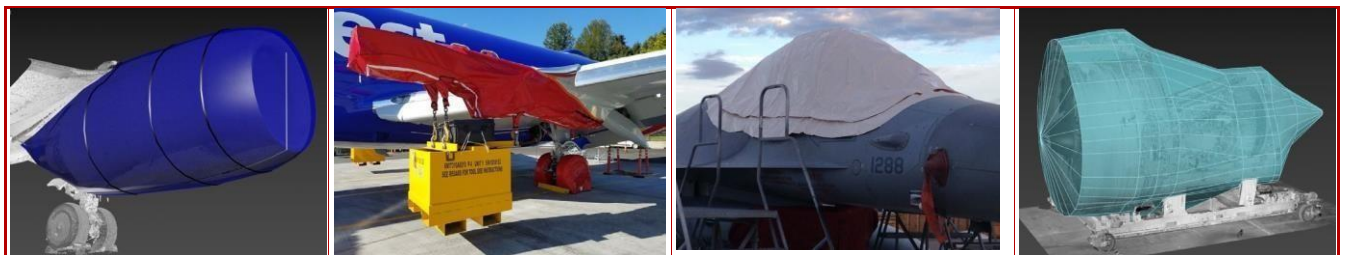

STEP 3

After teams review and any modifications to the original design, a prototype test cover is manufactured.

STEP 4 - The prototype test cover is delivered to the customer and installed to inspect for accuracy, fit and finish and to ensure all the requirements of the cover and its design have been met.

STEP 5 - A final part number is generated and documented for future cover needs.

Cover Plug System Solutions

The Preneet Cover Plug System provides the highest level of long-term protection available in the industry. Selected by major manufacturers when only the best will do, our Cover Plug System has a proven track record of successful implementation in the harshest of environments.

3 Distinct Layers of Protection

OUTER LAYER - Similar to a heavily loaded denim, the outermost layer of the cover is designed for extremely long life and protection of the aircraft in the harshest environments.

MIDDLE LAYER - hot melt adhesive containing VCI and anti-microbial additives with patented delivery processes for enhanced corrosion protection.

INNER LAYER – soft woven polyester to protect engine cowlings and other highly finished, delicate surfaces.

- Custom designed for fit using industry leading 3D scanning technology
- Originally designed for military use, our covers are built to perform
- Access doors for maintenance/desiccant exchange and document pouches for service tracking are included as no cost standard items
- The front (inlet) cover carries a siliconized circumferential ratchet band that allows the front cover to be installed without the need for straps from the rear to the front of the engine

Products and Pricing

COVER PLUG SYSTEM SETS:

737 MAX - Cover Plug System

Complete Kit (2 Engines) - Red Armordillo

Part Number: CPS737MXARR

List Price: Please check our sales department for pricing.

737 NG - Cover Plug System

Complete Kit (2 Engines) - Red Armordillo

Part Number: CPS737NGARR

List Price: Please check our sales department for pricing.

767 - Cover Plug System

Complete Kit (2 Engines) - Red Armordillo

Full Wrap & Two-Piece Cover Solutions

Preneet Full Wrap and 2 Piece Cover Solutions are our most cost-effective on wing protective solutions. Designed for short to medium storage periods, these cover sets allow for easy engine maintenance without requiring the full removal of the cover.

Our Features Set Us Apart

- Custom designed for fit using industry leading 3D scanning technology
- Lined with a non-abrasive, soft touch polyester material to protect delicate airplane surfaces from damage
- Cover materials manufactured with patented embedded VCI (Vapor Corrosion Inhibitor) to fight engine surface corrosion where cover meets airplane
- Access doors for maintenance/desiccant exchange and document pouches for service tracking are included as no cost standard items
- Covers can be used in the harshest of environments, but **full wrap covers require heat shrinking** to prevent damage in high wind areas (below right)

Products and Pricing

TWO PIECE COVER SETS:

737 MAX - 2 Piece Cover Set

Complete Kit - Red 7 Mil
Part Number: EOW737MX7MR
List Price: Please check our sales department for pricing.

737 NG - 2 Piece Cover Set

Complete Kit - Red 7 Mil
Part Number: EOW737NG7MR
List Price: Please check our sales department for pricing.

747-8 - 2 Piece Cover Set

Complete Kit - Red 7 Mil
Part Number: EOW74787MR
List Price: Please check our sales department for pricing.

787 - 2 Piece Cover Set

Complete Kit - White 10 Mil
Part Number: EOW78710MW
List Price: Please check our sales department for pricing.

A319 - 2 Piece Cover Set

Complete Kit - White 10 Mil
Part Number: EOWA32010MW
List Price: Please check our sales department for pricing.

A320 - 2 Piece Cover Set

Complete Kit - White 10 Mil
Part Number: EOWA32010MW
List Price: Please check our sales department for pricing.

A330-300 - 2 Piece Cover Set

Complete Kit - White 10 Mil
Part Number: EOWA33010MW
List Price: Please check our sales department for pricing.

Embraer 195 - 2 Piece Cover Set

Complete Kit - Red 7 Mil
Part Number: EOWE1957MR
List Price: Please check our sales department for pricing.

FULL WRAP COVER SETS:

737 NG - Full Wrap Cover Set

Complete Kit - Red 7 Mil
Part Number: FW737NG7MR
List Price: Please check our sales department for pricing.

747-8 - Full Wrap Cover Set

Complete Kit - Red 7 Mil
Part Number: FW74787MR
List Price: Please check our sales department for pricing.

777 - Full Wrap Cover Set

Complete Kit - Red 7 Mil
Part Number: FW7777MR
List Price: Please check our sales department for pricing.

787 - Full Wrap Cover Set

Complete Kit - Red 7 Mil
Part Number: FW787F7MR
List Price: Please check our sales department for pricing.

A319 - Full Wrap Cover Set

Complete Kit - White 10 Mil
Part Number: FWA31910MW
List Price: Please check our sales department for pricing.

A320 - Full Wrap Cover Set

Complete Kit - White 10 Mil
Part Number: FWA32010MW
List Price: Please check our sales department for pricing.

A330-300 - Full Wrap Cover Set

Complete Kit - Red 7 Mil
Part Number: FWA3307MR
List Price: Please check our sales department for pricing.

Engine on Stand Solutions

High-Tech Covers Start With High Tech Materials

Preneet Covers are designed and manufactured using patented materials and processes to create covers that provide the highest levels of protection in the most challenging environments.

The Preneet Advantage - What Our Covers Offer You

Protection against the Environment

- ✓ Proven against high winds and rain, extreme temperatures and humidity, sand dust, dirt, and wildlife

Light Weight & Easy to Install

- ✓ Designed for the flight line, our covers are lightweight, yet rugged

- *Solutions Available for Outdoor and Indoor Storage*
- *Cover serves as FOD cover and allows access for servicing*
- *Simply apply flame heat to shrink, and convert from a storage cover to a transport cover*

Breathable

- ✓ Patented materials allow for the escape of excess condensation, while protecting the assets from rain, snow, and other precipitants

Protection Against Corrosion

- ✓ Multi-layer construction with built in Vapor Corrosion Inhibitor (VCI)

Tire Cover Solutions

Preneet Tire Covers are a cost-effective cover solution that combines operational simplicity with the highest level of protection available.

Elegantly Simple – Everything that you need, and nothing that you don't.

Reusable - Stop throwing your dollars away on mylar and tape!!

Light Weight & Easy to Install

Designed for the flight line, our covers are lightweight, and can be installed in a fraction of the time as traditional protective storage methods.

Save Time on Routine Tire Maintenance!!

Easy removal and re-install means less time spent on performing routine maintenance tasks.
